

FLORIDA'S FEDERAL WATER FUNDING

February 2026

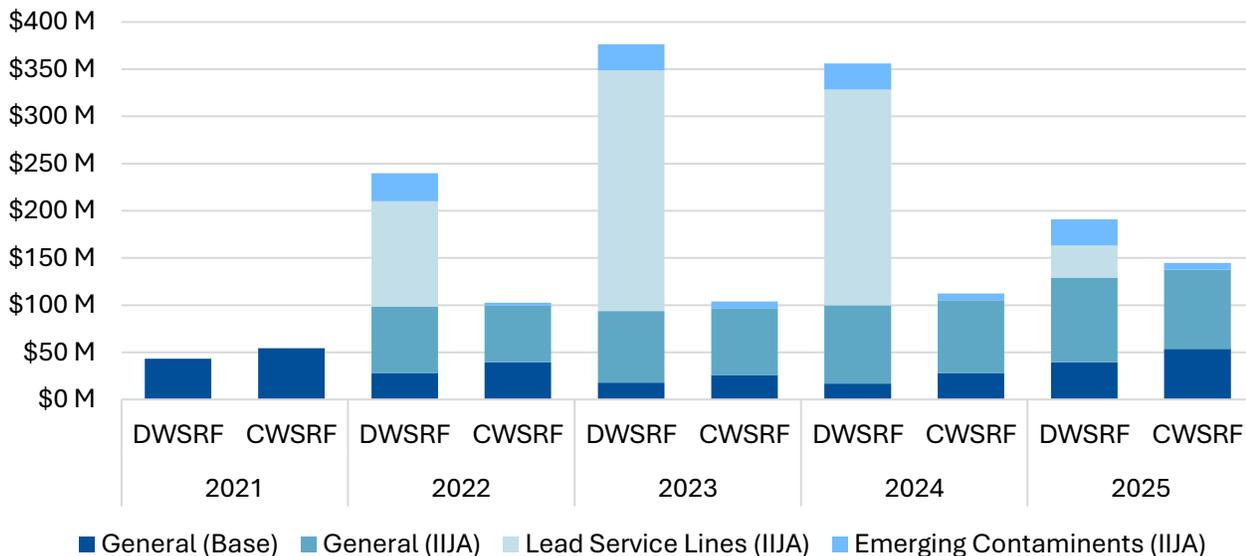

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$1.6 billion in SRF funds has helped Florida address a portion of its \$73.4 billion in infrastructure investment needs.

Florida has relied on \$1.6 billion in SRF support since 2022

Since 2022, Florida has been allotted **\$1.2 billion** for the state's DWSRF, including **\$629 million** to replace lead pipelines, and **\$464 million** for the state's CWSRF. These funds have supported local projects including the extension of Marin County's public drinking water system to communities currently reliant on private wells, and water conservation projects in Edgewater, Mount Dora, Deerfield Beach, Lake Wales, and Deltona that will reclaim water for reuse.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$73.4 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Florida is anticipated to need **\$26.8 billion** in drinking water investments and **\$46.6 billion** in

wastewater investments over the next two decades. The federal investments over the last four years help address **2.2 percent** of this gap, but further funding is required to maintain the state's water systems.
