

MAINE'S FEDERAL WATER FUNDING

February 2026

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking water and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$366 million in SRF funds has helped Maine address a portion of its \$6 billion in infrastructure investment needs.

Maine has relied on \$366 million in SRF support since 2022

Since 2022, Maine has been allotted **\$259 million** for the state's DWSRF, including **\$114 million** to replace lead pipelines, and **\$106 million** for the state's CWSRF. These funds have supported local projects including the remediation of emerging contaminants like PFAS in Poland, Buxton, Waterville, and Topsham, and upgrade Saco's Water Resource Recovery Facility to address sea level rise and increase climate resiliency.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$6 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Maine is anticipated to need **\$2 billion** in drinking water investments and **\$4 billion** in wastewater investments over the next two decades. The federal investments over the last four years help address **6.1 percent** of this gap, but further funding is required to maintain the state's water systems.
