

MINNESOTA'S FEDERAL WATER FUNDING

February 2026

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking water and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$701 million in SRF funds has helped Minnesota address a portion of its \$16.9 billion in infrastructure investment needs.

Minnesota has relied on \$701 million in SRF support since 2022

Since 2022, Minnesota has been allotted **\$448 million** for the state's DWSRF, including **\$229 million** to replace lead pipelines, and **\$253 million** for the state's CWSRF. These funds have supported local projects including the modernization of St. Paul's McCarrons Water Treatment Plant, replacing aging systems constructed in the mid-twentieth century with new water treatment technologies and increased capacity, and nonpoint source pollution management, improving watershed quality by reducing agricultural runoff, addressing groundwater contamination, and restoring habitat. The Minnesota Public Facilities Authority is receiving an [estimated](#) **\$12.3 million** set-aside to support program administration.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$16.9 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Minnesota is anticipated to need **\$10.2 billion** in drinking water investments and **\$6.7 billion** in wastewater investments over the next two decades. The federal investments over the last four years help address **4.2 percent** of this gap, but further funding is required to maintain the state's water systems.
