

NEVADA'S FEDERAL WATER FUNDING

February 2026

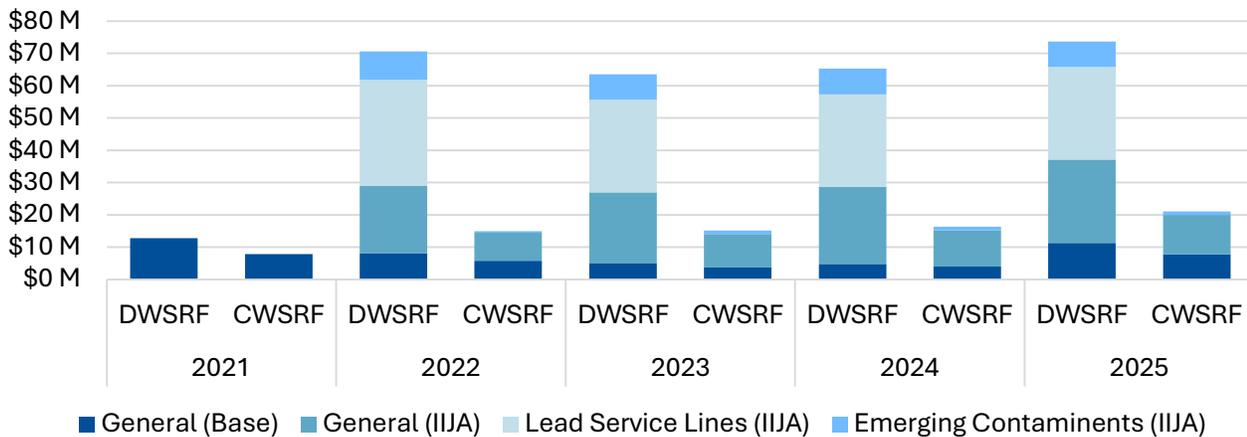

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking water and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$340 million in SRF funds has helped Nevada address a portion of its \$6.9 billion in infrastructure investment needs.

Nevada has relied on \$340 million in SRF support since 2022

Since 2022, Nevada has been allotted **\$273 million** for the state's DWSRF, including **\$119 million** to replace lead pipelines, and **\$67 million** for the state's CWSRF. These funds have supported local projects including Las Vegas Valley Water District reservoir and system improvements that will maintain clean drinking water for the region, and the expansion of the South Truckee Meadows Wastewater Treatment Facility in Reno, increasing its processing capacity as the region's population grows. The Nevada Division of Environmental Protection is receiving an [estimated \\$8 million](#) set-aside to support program administration.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$6.9 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Nevada is anticipated to need **\$6.4 billion** in drinking water investments and **\$531 million** in wastewater investments over the next two decades. The federal investments over the last four years help address **4.9 percent** of this gap, but further funding is required to maintain the state's water systems.
