

OHIO'S FEDERAL WATER FUNDING

February 2026

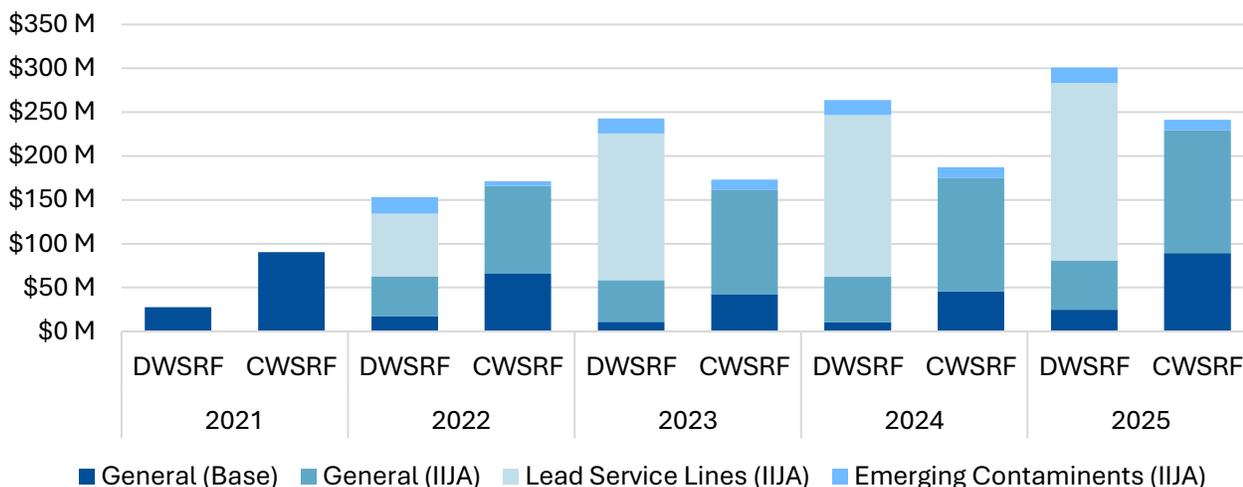

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking water and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$1.7 billion in SRF funds has helped Ohio address a portion of its \$36.7 billion in infrastructure investment needs.

Ohio has relied on \$1.7 billion in SRF support since 2022

Since 2022, Ohio has been allotted **\$961 million** for the state's DWSRF, including **\$625 million** to replace lead pipelines, and **\$733 million** for the state's CWSRF. These funds have supported local projects like the replacement of thousands of lead service lines throughout the state, including cities like Cleveland, Akron, Toledo, and Cincinnati, and the construction of the Northside Interceptor Tunnel, a vital upgrade that captures sewer overflows, protects the Cuyahoga River, and prepares Akron's wastewater system for future standards.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$36.7 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Ohio is anticipated to need **\$16.1 billion** in drinking water investments and **\$20.6 billion** in wastewater investments over the next two decades. The federal investments over the last four years help address **4.7 percent** of this gap, but further funding is required to maintain the state's water systems.
