

PENNSYLVANIA'S FEDERAL WATER FUNDING

February 2026

The EPA's Drinking Water and Clean Water State Revolving Funds (DWSRF and CWSRF) represent the nation's largest federal investment in drinking water and wastewater infrastructure, enabling states to better meet urgent water system needs in their communities. In recent years, \$1.5 billion in SRF funds has helped Pennsylvania address a portion of its \$37.1 billion in infrastructure investment needs.

Pennsylvania has relied on \$1.5 billion in SRF support since 2022

Since 2022, Pennsylvania has been allotted **\$1 billion** for the state's DWSRF, including **\$530 million** to replace lead pipelines, and **\$544 million** for the state's CWSRF. These funds have supported local projects including the replacement of 8,700 drinking water service connections that cause lead exposure in Erie, the replacement of 859 lead service lines in Pittsburgh, and wastewater system upgrades that will replace aging infrastructure and upgrade technology in Meadville. Pennsylvania Department of Environmental Protection is receiving an **estimated \$26.5 million** set-aside to support program administration.

Federal support for the SRFs has increased since 2022

An additional \$43 billion was appropriated for the SRFs by the Infrastructure Investment and Jobs Act (IIJA) and is being distributed annually between 2022 and 2026.

\$37.1 billion in future water infrastructure needs

Per the latest [Drinking Water Infrastructure Needs Survey and Assessment](#) and [Clean Watershed Needs Survey](#), Pennsylvania is anticipated to need **\$24.3 billion** in drinking water investments and **\$12.8 billion** in wastewater investments over the next two decades. The federal investments over the last four years help address **4.2 percent** of this gap, but further funding is required to maintain the state's water systems.
